

# TFLEX-G2™ SERIES

Tflex-G219P

*Field Proven,  
Tflex  
Pilothouse  
Performance,  
from  
12"-19"!*

Tflex-G212PST

- Sunlight Readable Transflective LCD.
- 2000+ Nit Brightness Equivalent in Direct Sunlight.
- Wide Side Angle Visibility.
- Large 12", 17" and 19" High Resolution LCD's.
- Optional 12" SunTouch™ Sunlight Readable Touch Screen (G212PST)
- Ideal for Pilothouse or Other Sheltered Installations.
- Internal Corrosion Resistant Electronics.
- Acrylic Dimming Filter for Night Running (Optional).
- Flush or RAM Mount Design.
- A/C or 12 Volt Power Ready (Optional DC/DC Converter).

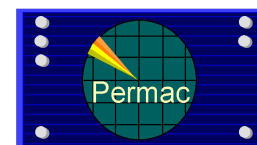

The Argonaut Tflex-G2P pilothouse monitor series offers you solid sunlight viewable performance and value. These monitors are optically engineered to work in high glare conditions such as pilothouses or other bright protected vessel areas. Corrosion protected electronics keep these monitors working smoothly in the marine environment. A wide range of sizes including 12", 17" and 19" are available for practically any vessel. The 12" model also can be optionally equipped with our latest touch screen innovation called "SunTouch". Traditional touch screen technology is very difficult to see in direct sunshine. Argonaut's G212P-ST, SunTouch equipped monitor uses advanced optical index matching technology to bring you truly remarkable touch screen readability in direct, bright sunshine!

Compact designs allow mounting these large format screens in surprisingly tight spaces. The G219P monitor, for example, provides a huge 19" diagonal viewing area and has an outer frame edge that extends only one centimeter around all sides! Ideal for dramatic glass bridge installations, the G219P is priced thousands below competitive products at only \$1,795!

Argonaut's proprietary Tflex technology is the world's most advanced approach to sunlight readability. The brighter the light on the display surface, the brighter the screen becomes as Tflex optical technology harnesses light energy and reflects it back out through the image. Dynamic engineering effectively lowers heat and power consumption over old style high bright displays, increasing life expectancy and reliability. The standard VGA port gives you an easy connection to any PC, or the latest generation black box marine electronics and optional video or DVI connections are available. Argonaut revolutionized the use of Tflex technology with mission critical performance, reliability and value!

# Argonaut® Tflex-G2™ Series Specifications

MSRP  
\$1,295

## Tflex-G212P

<b>Display Type</b>
Transflective TFT
<b>Color LCD</b>
<b>Display Area (Diagonal)</b>
12.1"
<b>Resolution/Pixels</b>
SVGA/800x600
<b>Sunlight View</b>
2000+ cd/m <sup>2</sup>
<b>Nightview Backlight</b>
300 nits (cd/m <sup>2</sup> ) typical
<b>Input Signal Video</b>
SVGA
<b>User Control</b>
Power on/off with LED, Menu, Select, Adjustment (up/down)
<b>OSD</b>
Brightness, Contrast, RGB Contrast, Auto Setup, Frequency Phase, H/V-position, Track, Display Mode/Freq. Recall
<b>Refresh Rate</b>
Up to 85Hz
<b>Power Supply</b>
Universal 100-240VAC; DC 12V/3.33A
<b>EMI</b>
C-UL, FCC, CE, UL, BSMI
<b>Environmental</b>
<b>Operating Temperature:</b> 32°F~100°F
<b>Operating Altitude:</b> to 10,000 feet
Internal VCI corrosion protection
<b>Dimensions (HxWxD Inches)/Weight</b>
9.3"x12.3"x2.9"/9lbs
<b>Mounting Options</b>
Flush mount; Adjustable RAM Mount (optional)

Note: The specifications and pictures are subject to change without notice.  
\*Brightness equivalent in direct sun.

MSRP  
\$1,395

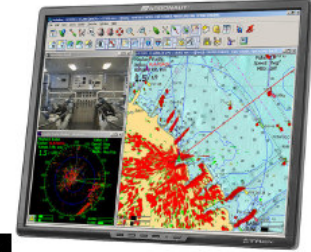

## Tflex-G217P

<b>Display Type</b>
Transflective TFT
<b>Color LCD</b>
<b>Display Area (Diagonal)</b>
17"
<b>Resolution/Pixels</b>
SXGA/1280x1024
<b>Sunlight View</b>
2000+ cd/m <sup>2</sup>
<b>Nightview Backlight</b>
475 nits (cd/m <sup>2</sup> ) typical
<b>Input Signal Video</b>
